

**EMP**

**ENGINEERED MARINE PRODUCTS™**

**ENGINEERED MARINE  
PRODUCTS**

The EMP product line was introduced in 2006. SealTech wanted to provide customers with a branded, thoroughly marketed product line without...the associated effort it takes to develop a private label program. What sets our EMP line apart is the low level of saturation in the market. EMP is a more exclusive line than the average national brand, in that we don't over distribute. EMP™ is an OEM quality product line for those distributors and dealers that have no desire to build their own private label.

The EMP™ product line currently has over 2,300 individual part numbers and continues to grow. The line includes impellers, bellows, gear sets, oil seals, custom molded plastic housings, die casting, fasteners, thermostats, electrical and ignition components, head gaskets, shafts and many other components for applications of Johnson/Evinrude™, Mercury™, Mercruiser™, Yamaha™, Suzuki™, Honda™ engines as well as Jabsco™, Johnson™ and Sherwood™ pumps.

**Benefits of EMP™:**

- Higher Profit Margins
- Custom kits & assembly
- Marketing & promotional support
- One year manufacturer's warranty (Very low warranty service claim record)
- Sales tools w/ literature and illustrations
- Complete product offering
